DISCOVER THE MOST **POWERFUL** TIMERS

ABOUT **Syr-LINE**

The new specialized range at Crouzet, aimed to satisfy the most unique requirements of your applications by innovating in design, engineering and development.

Meet the first member of the Syr-Line range:

The 17.5 mm Analog Timers, a new family of 6 timers with higher power of 16 A and double output of 8 A, with all the classic functions and 2 additional special functions.

HIGH POWER 1 x 16 A

CONTROL MORE OR BIGGER LOADS

Forget about having a combination of Timer and Contactor to control bigger loads or a larger number of loads, Syr-Line are your all-in-one solution..

EXTRA PROTECTION WHEN YOU NEED IT

Syr-Line products have greater capacity to withstand surge or inrush current than standard timers due to higher current capacity.

SPECIAL FUNCTIONS:

LATCHING AND DELAYED LATCHING

Along with the classic functions, Syr-Line offers the special functions Latching (Alternating) (TL) and Delayed Latching (Alternating) (Tt), allowing you to turn on and off the output relay with a voltage signal.

WIDE TIME RANGE

Program your timer to work from as little as 0.5 seconds delay to as long as a 10-day delay (240 hours).

DOUBLE OUTPUT 2 x 8 A

INSTANTANEOUS OR TIMED RELAY IN A SLIM PACKAGE

The only 17.5 mm timer on the market offering a dual output version with easy selection on the front face, allowing the option of both outputs to work together simultaneously, or one working instantaneously and the other delayed.

OPTION 1: INSTANTANEOUS

Turn on one output instantaneously and the second output with a time delay, to allow different loads to be switched-on gradually.

OPTION 2: TIMED

Select the two output relays working together and reduce costs by controlling different loads with the same device.

MONO OR MULTI FUNCTION

Select between a multifunction version with the 12 most popular functions or a monofunction version ON-Delay or Repeat-Cycle.

INTERNATIONAL CERTIFICATIONS

Compliant with the highest standards, Syr-Line 17.5 mm timers are cULus, CE, RoHS and CCC certified.

ENGINEERING EXPERTISE FOR CUSTOM NEEDS

Crouzet can easily customize Syr-Line timers for your specific application.

› Part Number System

PRODUCT LAYOUT

PROTECTIVE COVER

- › Protect the knobs and the front face from the environment and avoid accidental movement

MODULAR SHAPE

- › To fit in modular panels

SMALL SCREW POTENTIOMETERS

- › For right tuning of your timer

LARGE POTENTIOMETERS

- › Allows to set the right configuration in your timer with your fingers

SPECIAL FUNCTION

- › To select special functions Latching (Alternating) and Delayed Latching (Alternating) or select in double output versions if second relay works timed or instantaneous

UNIVERSAL POWER SUPPLY

- › Syr-line timers fits all popular voltages from 12 → 240 V \bar{c}
- › Connexion compatible with the standard industrial layout

SIGNAL INPUT

- › For functions when controlling the timer with a signal is needed

DIN RAIL MOUNT

- › For easy installation in your panel

SLIM PACKAGE

- › 17.5 mm width plastic housing that helps you save space in your panel

FUNCTIONS MARKING

- › With all the function diagrams available for each part number

2 LED INDICATORS

- › For visualization of the status and output of your timer

HIGH POWER 1 x 16 A

- › Relay output version for high power applications

DOUBLE 2 x 8 A

- › Relay output version available for standard power applications that requires two relays
